The complete spectrum

**3M General Purpose Masking Tape**  
Product: 2120

Reliable general purpose product for room temperature use. Ideal for critical paint masking but also bundling, sealing, attaching or even labelling.

**3M 80 Degree Masking Tape**  
Product: 2321

A general purpose masking tape that cleanly removes even after low temperature bake cycles of up to 80°C. Also effective for bundling, sealing, attaching or even labelling if necessary.

**3M High Strength Masking Tape**  
Product: 202

This thicker tape has a stronger internal structure which resists lifting or curling at the edges under tensile strength. It also offers excellent moisture and solvent resistance.

**3M Low Tack Masking Tape**  
Product: 1104

With a specially formulated adhesive this product offers a less aggressive bond which prevents lifting of paint or other surface coatings.

**3M 100 Degree Masking Tape**  
Product: 2364

A balanced product that can withstand higher temperatures up to 100°C and is also moisture and solvent resistant.

**3M 160 Degree Masking Tape**  
Product: 2610

Highest performing paper masking product which will perform up to 160°C. Can withstand repeat bake cycles and is both moisture and solvent resistant.

A simple, colour coded range of products to meet all your masking needs
