

GREAT

RESULTS COME
FROM small DETAILS

With electronic devices becoming more and more compact, manufacturers are constantly looking at ways to reduce the size and weight of their products even further. With Scapa AFFT (Acrylic Foam Film Tape) and Scapa AFT (Acrylic Foam Tape) as an alternative to mechanical fixings, manufacturers have the freedom to innovate.

Freedom to innovate

A young man and woman are sitting on the grass outdoors, looking at a laptop. The man is on the left, wearing a light blue shirt, and the woman is on the right, wearing a teal shirt. They are both smiling and looking at the laptop screen. The background is a blurred green field with trees.

Design you create

Scapa AFFT and AFT provide electronics manufacturers with a space saving, alternative bonding solution to mechanical fixings. This enables them to design and create light weight, ultra thin devices that meet the exacting demands of the consumer.

Performance you maintain

Electronic devices are subjected to various traumas on a daily basis. Scapa AFFT and AFT protects the device and its internal components from external influences by cushioning, damping vibration and absorbing impact. Stress is dissipated throughout the foam core, protecting the device and providing long lasting performance and reliability.

Products you enhance

By using Scapa AFFT and AFT within a device, electronics manufacturers can expect a product's lifetime to be extended. UV, chemical and moisture resistant, Scapa AFFT and AFT are suitable for all kinds of environmental conditions. They provide a secure and protective bonding solution giving the user long, uninterrupted performance.

Shaping imagination

Our AFFT and AFT ranges are easy to die-cut, and can be customised for adhesion levels and colours.

Scapa AFFT

The Scapa AFFT range is the ideal bonding solution for state of the art, ultra thin mobile phones, laptops and cameras. With a thickness as low as 0.15mm, Scapa Acrylic Foam Film Tapes are the solution for today's slim and lightweight devices.

Scapa's AFFT range includes a removable solution, which helps to save time and money when fitting together intricate and sophisticated device components.

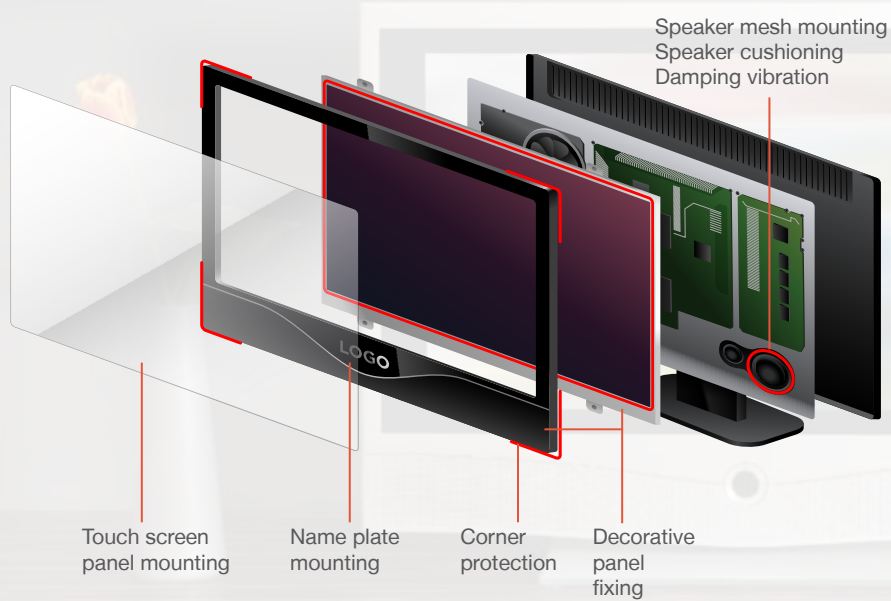

Scapa AFT

The Scapa AFT range is the flexible alternative to mechanical fixings for bonding display, laptop and camera components. Scapa's AFT products bond intricate components and dis-similar surfaces. With the added benefit of sealing gaps and irregularities between surfaces, Scapa's AFT products are perfect for enabling electronics manufacturers to produce thinner and lighter devices.

AFT - Display

For display, Scapa AFT is specially designed for:

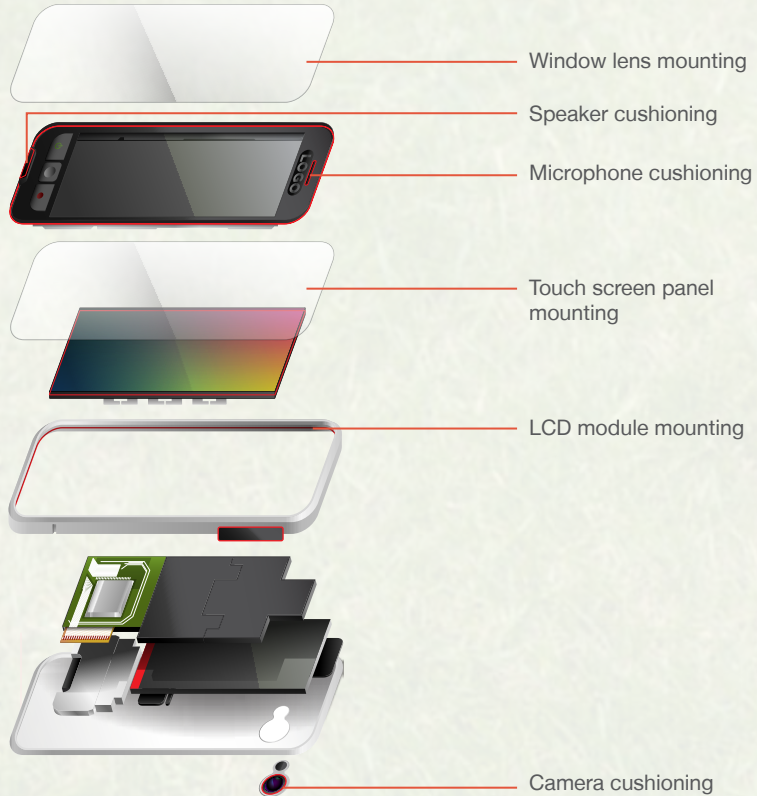

- Decorative panel fixing
- Touch screen panel mounting
- Stand fixing
- Corner protection
- Name plate mounting
- Speaker mesh mounting

AFFT - Mobile Phones

For mobile phones, Scapa AFFT is specially designed for:

- Touch screen panel mounting
- Window lens mounting
- LCD module mounting
- Speaker and microphone cushioning
- Camera cushioning

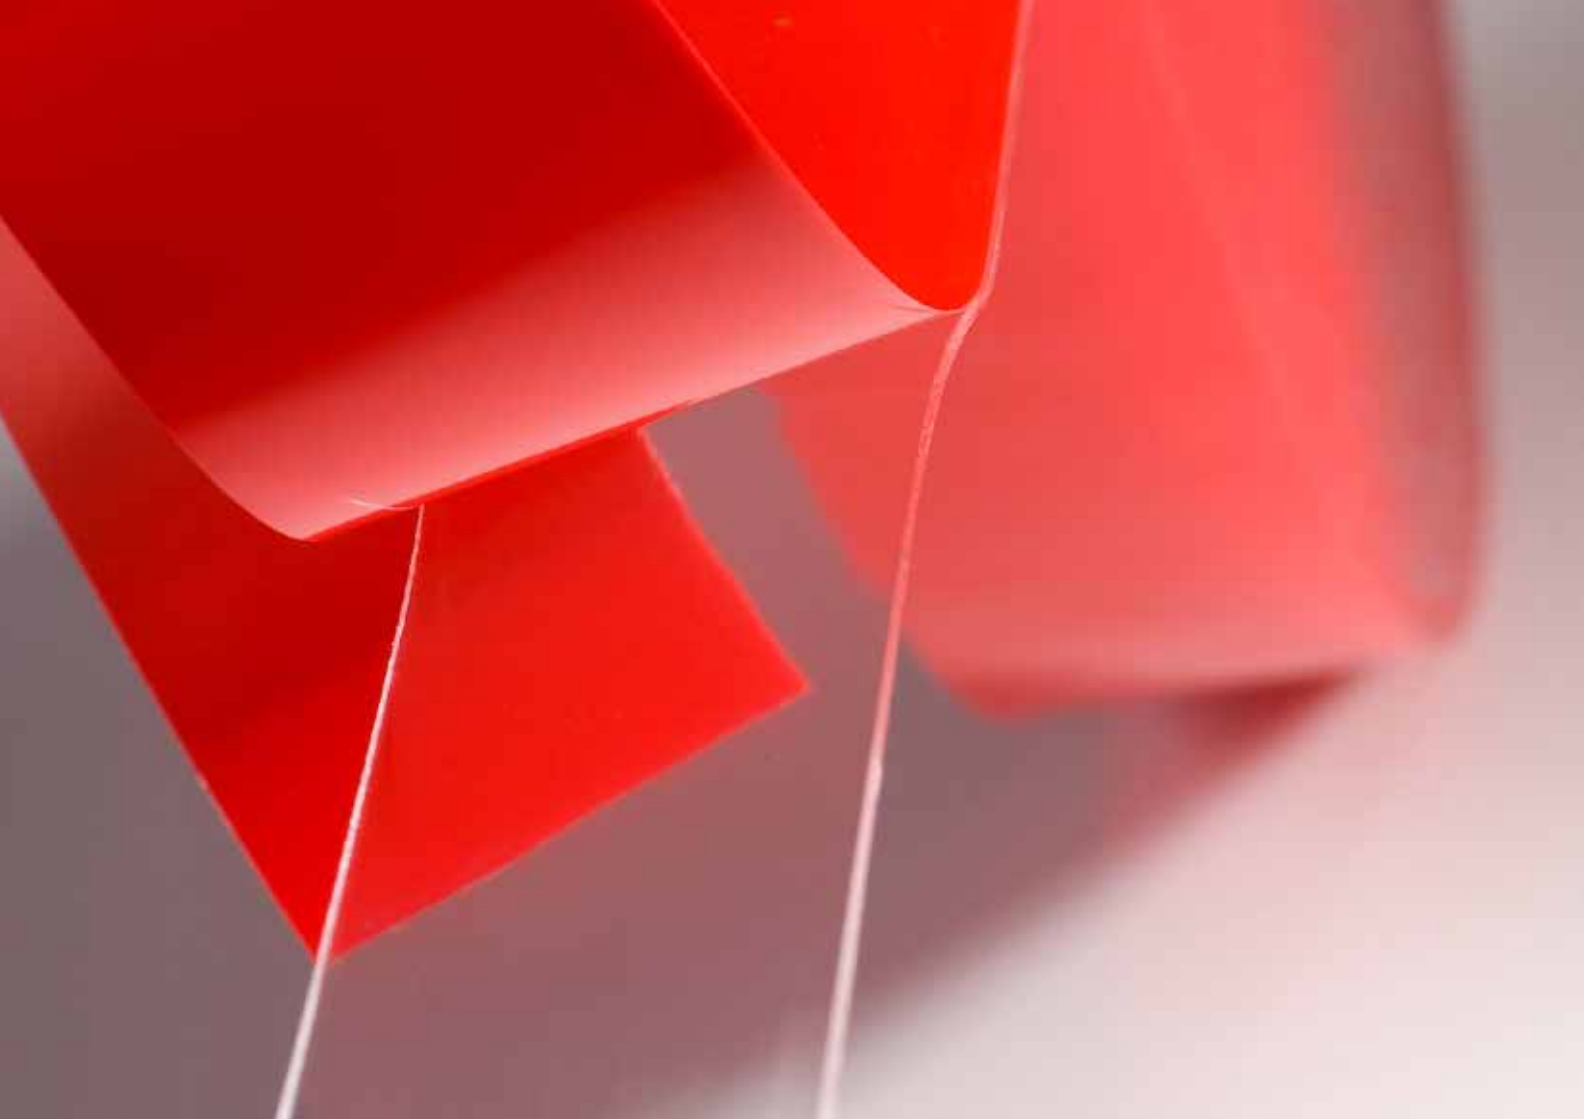

AFFT and AFT - Computers

For computers, Scapa AFFT and AFT is specially designed for:

- Display module bonding
- Bezel bonding
- Speaker and microphone cushioning
- Camera cushioning
- Ventilator dampening
