MED 6501SI Double-Coated, Trilaminar PU Film with a Soft Silicone Adhesive with 1.6mm/0.06” perforation pattern

MED 6501SI is a double-coated, transparent polyurethane film with a soft silicone adhesive (SSA) to adhere to the skin, and an acrylic adhesive suitable for a wide variety of materials. The softness, conformability, and the repositionability of the silicone adhesive offers a high degree of user comfort. The 1.6mm/0.06” perforation pattern in the trilaminar construction provides breathability through its perforations, and allows for exudate and moisture management to reduce skin maceration.
